

PAIN MANAGEMENT BASICS

for Primary Care Providers

How much pain medicine is too much?

When is too soon to send to Pain Care Specialists?

Are you concerned about recently released CDC Opiate Guidelines?

- Are you concerned about prescribing opiates and other pain narcotics?
- Do you need some general guidelines for prescribing pain medications?
- Does your facility have proper protocols for monitoring medications?
- Do you feel like pain patients are crowding your clinic and inhibiting your ability to treat your primary care patients?
- Are you interested in learning opiate reduction strategies?

Dana Wilging, PA

About the Presenter

Dana Wilging, a Physician Assistant with USA Pain Clinics, is available to hold a brown-bag lunch training session with your providers. Dana's experience and professional approach will be very insightful and informative.

Our Brown Bag Lunch Training Session offers helpful information for medical professionals.

To schedule a brown bag pain management training session, contact:
